

CASH IN SCHOOL BUILDINGS
(Safes and Safe Combinations)

To reduce the hazard of safes being burglarized or opened by persons unknown with resulting loss of school district funds and in recognition of the fact that in some instances safes have been opened without apparent damage or force, these regulations must be followed:

1. All safes will have the combination changed anytime an employee with the combination leaves their position for any reason.
2. The combination to a safe will be given to not more than three employees such as the principal, assistant principal and/or school secretary.
3. If an employee who has the combination ceases to have responsibility for the safe, i.e., is transferred or terminates employment, the principal or one of the remaining holders will request the combination be changed immediately.
4. Each employee assigned responsibility for a safe will agree that under no conditions will they pass this information on to any other person nor will they have the combination written in any location that might be chanced upon by any individual.

These regulations apply to all safes and vaults.
